

N8n project:

- 1. AI Customer Support Agent**
 - User sends a question → AI understands it → searches FAQ/Google Sheet → responds.
 - Escalates unanswered questions to a human.
- 2. Smart Expense Tracker**
 - Send expense through WhatsApp/email/form.
 - AI extracts amount, category, date, and description.
 - Stores everything in Google Sheets.
 - Generates weekly/monthly spending summaries.
- 3. Student Attendance & Alert System**
 - Attendance stored in Google Sheets.
 - n8n detects low attendance.
 - Automatically sends personalized alerts to students/parents.
 - Generates faculty reports.
- 4. AI Resume Screening System**
 - Upload resumes → extract candidate information.
 - AI scores candidates against a job description.
 - Stores results in Google Sheets.
 - Automatically emails shortlisted candidates.
- 5. Research Paper Assistant**
 - Add paper PDFs/links.
 - AI extracts title, authors, methodology, dataset, results, limitations.
 - Stores structured information in Google Sheets/Notion.
 - Ask questions across your collected papers.
- 6. Automated Leave Management**
 - Employee submits leave request.
 - n8n checks leave balance.
 - AI validates the request.
 - Updates the database and sends approval/rejection notification.
- 7. AI Email Assistant**
 - Monitor incoming emails.
 - Classify them: urgent / academic / personal / promotional.
 - Summarize important emails.
 - Draft appropriate replies.
 - Send only after approval.
- 8. Price Monitoring & Alert System**
 - Track selected products periodically.
 - Compare current vs previous prices.
 - Store history.
 - Notify when price drops below a specified threshold.
- 9. AI Complaint Management System**
 - Customer submits complaint.
 - AI identifies category and priority.
 - Creates a ticket.
 - Assigns it to the appropriate department.
 - Tracks resolution and sends updates.
- 10. Personal AI Daily Assistant**

- Every morning n8n collects tasks, calendar events, weather, and important emails.
- AI creates a concise daily briefing.
- Evening workflow summarizes completed/pending tasks.
